Summary

I am a 2024 Applied Geophysics Graduate at Nnamdi Azikiwe University, Awka. Having knowledge on software like ArcGIS which is used to display geographic data and analyzing of resistivity data using IP2WIN or MS Excel. I am passionate about crafting engaging user experiences and leveraging technology to solve real-world challenges.

Beyond my technical expertise, I have valuable experience as a Frontend developer with expertise in HTML5, CSS, and JavaScript. I effectively combined technical and organizational skills to deliver impactful results.

I am open to volunteering opportunities, internships, and part-time roles as a GIS analyst, resistivity data analyst, web development, or other tech-related fields that promote growth and innovation.

Let's connect and collaborate on meaningful project
